

Here are the iOS download instructions for Safeguarding Houses of Worship. We respectfully request that you share the plan, once completed, with the primary law enforcement agency for your local jurisdiction.

### Installing Safeguarding Houses of Worship on your iOS device:

Below you will find the download code you will need to download the app to an Apple device. To download Safeguarding Houses of Worship, open the App Store and log in using your iTunes account information. Towards the bottom of the "Favorites" screen will be a button marked "Redeem." Click on it and you will be prompted to enter a code. This is where you will enter the download code. You will not be able to find Safeguarding Houses of Worship as an app if you search for it in the App Store, as we are using this download code to help us vet who receives the app. It is one download code per device, so let me know if you would like additional download codes for different people or devices (such as one code for an iPhone and another for an iPad).

You can also take advantage of our free houses of worship resources available at our main program website's houses of worship page at [https://www.justnet.org/resources/Houses\\_of\\_Worship.html](https://www.justnet.org/resources/Houses_of_Worship.html). There you will find several links to various websites relating to safeguarding places of worship. If you have any questions, please contact me by phone at (301) 240-6745 or by email at [asknlectc@justnet.org](mailto:asknlectc@justnet.org).
